

**Title:** Abstract Title

**Author(s):** Lastname1, Firstname1 and Lastname2, Firstname2, etc

**Speaker:** Lastname, Firstname

**Affiliation(s):** Institution (Country)

**Session:**

**Chair(s):**

**Keywords:** queueing theory; stochastic networks; heavy traffic

**Abstract:**

Summary of rules:

1. Edit ONLY the file `ecqt26_abstract.tex` (do not add packages).
2. Fill the metadata fields: `ECQTtitle`, `ECQTspeaker`, etc.
3. Write the abstract inside: `begin{ECQTabstract}...end{ECQTabstract}`
4. Length limit: the abstract body must contain at most 2500 characters (including spaces)
5. Basic math formulas are allowed via standard packages `amsmath`/`amssymb`, e.g.,  $\mathbb{E}[X] = \int_0^\infty xf(x) dx$ .
6. Do NOT define macros/commands: no `newcommand`, `renewcommand`, `def`, etc.
7. Do NOT include figures, tables, or bibliographies; do not use `cite` or `bibliography`.
